PROFESSIONAL SUMMARY

Results-driven Data Analyst and Python Developer with hands-on experience in data analysis, machine learning, and AI automation. Delivered end-to-end analytics solutions for a retail client across a 6-month engagement, achieving a 4-star client satisfaction rating. Proven ability to build data pipelines, develop ML-powered applications, and present data-driven insights to stakeholders. Pursuing a B.E. in Computer Science (7.8 CGPA) at VTU, expected to graduate in 2026. Seeking to apply strong analytical and Python development skills to drive measurable business impact through data.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data and Analytics: Data Analysis, Data Cleaning, Data Visualization, Statistical Analysis, Predictive Modelling, Data Reporting, ETL Pipelines

Machine Learning and AI: Machine Learning, AI Automation, Behavioural Analysis, Rule-based AI Systems, Decision Logic

Tools and Platforms: MS Excel, Jupyter Notebook, VS Code, Git, GitHub, FastAPI, SQLite

Soft Skills: Client Communication, Team Leadership, Problem Solving, Time Management, Attention to Detail, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Freelance Data Analyst *11/2023 - 04/2024*

Self-Employed (Remote) | Client: Retail Supermarket | Duration: 6 Months

- Designed and executed end-to-end data cleaning pipelines using Python and MS Excel, standardising large retail datasets and measurably reducing data inconsistencies to improve reporting accuracy.
- Developed interactive data visualisation dashboards tracking inventory levels, sales trends, and customer purchase behaviour, enabling the client to make faster and more confident stock decisions.
- Analysed and translated complex datasets into clear, actionable business insights that directly shaped the client's procurement and stock-level strategy, achieving a 4-star client satisfaction rating.

KEY PROJECTS

Anti-Procrastination Coach *College Project | 2025*

Python | AI Automation | Behavioural Analysis | Rule-based AI Systems

- Developed an AI-powered task companion in Python that tracks user tasks, detects procrastination patterns through behavioural analysis, and delivers personalised nudges using rule-based automation.
- Engineered the complete logic layer from scratch, including state machines, pattern detection algorithms, and a feedback engine, demonstrating strong applied Python and AI system design skills.
- Designed to support roles requiring AI automation, behavioural modelling, and data-driven decision systems.

Mini Chess Engine *College Project | 2024*

Python | Object-Oriented Programming | Algorithm Design

- Developed a fully functional two-player chess game in Python, implementing all standard rules including castling, en passant, pawn promotion, and check/checkmate detection.
- Applied object-oriented programming principles and algorithm design to manage game state, validate legal moves, and handle edge cases with clean, maintainable code.

Foodly - Smart Food Pre-Booking System *Personal Project | 2025*

Python | FastAPI | SQLite | AI-assisted Development

- Developed a smart food pre-booking platform that synchronises restaurant cooking schedules with user arrival time, eliminating waiting time and ensuring freshly prepared meals.
- Built a Smart Timing Engine that calculates the optimal cooking start time based on user arrival input and dynamically adjusts the schedule when a user reports a delay.
- Implemented key features including Veg/Non-Veg filtering, cuisine-based search, a pre-booking workflow, and a restaurant-facing dashboard for order and status management.
- Architected the system across a Python/FastAPI backend and SQLite database, with scope for future AI-based recommendations and GPS arrival tracking.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science *07/2022 - Present (Expected 2026)*

Government Engineering College, Chamarajanagara | Visvesvaraya Technological University (VTU), Belagavi

CGPA: 7.8 / 10 | First Class with Distinction

Pre-University Course (PUC) - Science *2021 - 2022*

Government PU College, Mudigere, Chikmagalur | Score: 75%

Secondary School Leaving Certificate (SSLC) *2019 - 2020*

St. Marathas High School, Mudigere, Chikmagalur | Score: 76%

CERTIFICATIONS AND ACHIEVEMENTS

- Deloitte Data Analytics Job Simulation - Certificate of Completion (Data Analysis and Forensic Technology), via Forage, April 2026
- Certificate of Participation - 404: Limits Not Found, 24-Hour Hackathon (Theme: Build the Impossible), BMSCE ACM Student Chapter, March 2026
- Data Science Certificate of Completion - Internshala Online Training (6-Month Programme), 2026
- Team Leader, College Group Project - Led and coordinated all backend development tasks and managed deliverables across team members, January 2024
- 4-Star Freelance Client Rating - Earned for delivering high-quality retail data analytics work with documented client satisfaction, November 2023

Available to join immediately | Open to On-site, Hybrid and Remote roles in Bangalore
